Computer scientist and engineer with experience in machine learning, cybersecurity, and federal energy research. Developed AI solutions for logistics and oversaw \$60M+ in energy projects

EDUCATION

West Virginia University	M.S.	 Computer Science	 Aug 2023	 GPA: 4.00 / 4.00
> Advisor: Prof. Katerina Goseva-Popstojanova				
West Virginia University	B.S.	 Computer Science and Engineering	 May 2021	 GPA: 3.81 / 4.00

PROJECTS

A Longitudinal Study of Factors That Affect User Interactions with Social Media and Email Spam

- > Read here researchrepository.wvu.edu/etd/12069/
- > Studied 221 participants to analyze factors influencing spam interactions via surveys and data analysis.
- > Used longitudinal analysis and logistic regression to identify key factors reducing spam victimization.

Data Analysis

Python

Cybersecurity

Finding Anomalies In Anonymous Hospital Data

- > Identified anomalies in a dataset with anonymous features and labels using a selected method.
- > Applied an autoencoder algorithm from GitHub to detect anomalies in the dataset.

Anomaly Detection

Machine Learning

Big Data

Data Mining

WORK EXPERIENCE

General Engineer

DOE / NETL

 Nov 2024 – Feb 2025

 Morgantown, WV

The National Energy Technology Laboratory (NETL) is a U.S. Department of Energy research lab focused on energy innovation and technology development. I was on the Demonstration and Deployment team.

- > Managed over \$60M in federal energy research, including Grid Resilience and Innovation Partnerships (GRIP) initiatives.
- > Oversaw financial agreements and technical execution, ensuring alignment with legislative and program objectives.
- > Led a congressionally directed spending project, coordinating technical and financial oversight.

Project Management

Technical Oversight

Financial Compliance

Computer Vision Intern

Cargoshot Inc.

 Sep 2022 – Feb 2023

 Remote

CargoShot is a logistics application that documents freight conditions throughout the shipping lifecycle, reducing fines and claims by capturing organized proof-of-condition images linked to order details.

- > Developed an iOS prototype app with Xcode and Swift, iterating based on user feedback.
- > Developed machine learning models for warehouse pallet detection and visual data processing.
- > Enabled CargoShot to secure a client in supply chain management through the prototype.
- > Collaborated with stakeholders to refine project requirements and ensure business alignment.

Swift

Xcode

Graduate Teaching Assistant

West Virginia University

 Aug 2021 – May 2023

 Morgantown, WV

- > Taught 30-person CS 111 (Java) and CS 230 (Web Development) labs, providing in-person and remote instruction.
- > Developed lab activities and adapted materials, offering one-on-one support and reinforcing course content.
- > Managed grading with automation tools and identified academic dishonesty in large-scale projects.

Education

Java

Angular

Bootstrap

Firebase

Engineering Research Technician

CDC / NIOSH

 June 2019 – Aug 2019

 Morgantown, WV

- > Used MATLAB machine learning for signal analysis of mouse breathing data, aiding research interpretation.
- > Identified anomalies in breathing patterns by analyzing signal deviations, supporting research insights.

Signal Processing

MATLAB

Research

WVU IT Desk Worker

West Virginia University

 June 2020 – Aug 2021

 Morgantown, WV

- > Provided technical support to students and faculty, troubleshooting IT issues via phone and email.
- > Resolved account, network, and software issues, maintaining documentation and staying updated on WVU systems.
